SnoPro
Racing Intelligence

SnoLITE^2

An excellent, low-cost starter system with expansion capability. Recommended for single-cylinder/junior applications.

The **SnoLITE^2** is a compact, dash based system that is easy to install and easy to use. It features pixel-based graphical display with large, easy-to-read numbers, sharp, detailed histograms and on-dash replays. You can review your entire session on the display without downloading. Or, you can download detailed performance with the removable DataKey, for later analysis on your laptop/PC.
